Intermediate-Senior Environmental Engineer/Scientist

An Exceptional Environment for Engineering

These are exciting times for Cole Engineering Group Ltd., boasting a momentum and an energy that clearly differentiates us. We are an established company with a new vision in consulting services in Environmental Sciences and Engineering led by top industry leaders. If you are an engineering professional with abilities, talents and aspirations, we would like to hear from you.

Cole Engineering Group respects and celebrates the excellence of its staff and is proud of its ranking as one of the 50 Best Employers in Canada by Queen's Centre for Business Venturing, Hewitt Associates, and the Globe and Mail. As an equal opportunity employer, we offer a first class working environment and highly competitive compensation packages including performance bonus opportunities.

Qualified, professionally registered individuals and industry leaders with experience in the categories listed below may apply online to: **Careers@ColeEngineering.ca**.

Intermediate-Senior Environmental Engineer/Scientist

Cole Engineering Group is a mid sized multi-disciplinary engineering firm located in Markham (Hwy 404 and Hwy 7), specializing in land development, transportation, water resources, and municipal infrastructure. The company is seeking an intermediate to senior Environmental Specialist (P.Eng. or P.Geo) with 5-10 years experience to provide technical support in the Environmental Management Group. The vision for the Environmental Management Group is to provide high-end, technical services in the fields of natural sciences, engineering, planning and development, and to become one of the leading environmental engineering groups within Ontario.

Candidate must have a strong technical background, good problem solving abilities and be able to work in a team environment. Candidate should have a good understanding of current environmental regulations, be recognized as a qualified person to conduct Phase I, II and III Environmental Site Assessments, have experience with Risk Assessments and designated substances and hazardous materials surveys.

Work may include but is not limited to:

- Project management and resource management
- Directing field work – drilling supervision, stream flow monitoring, sample collection; water level monitoring, door-to-door water well surveys, environmental field inspections;
- Addressing and responding to public inquiries;
- Compilation of Reports; and
- Proposal Writing.

Cole Engineering recognizes that our strength is in the people we work with and provides competitive compensation, interesting opportunities, and a safe and supportive work environment.

Candidates interested in a position should forward CVs to: **careers@coleengineering.ca**
