

## Senior Transportation Planner/Traffic Engineer

### **An Exceptional Environment for Engineering**

These are exciting times for Cole Engineering Group Ltd., boasting a momentum and an energy that clearly differentiates us. We are an established company with a new vision in consulting services in Environmental Sciences and Engineering led by top industry leaders. If you are an engineering professional with abilities, talents and aspirations, we would like to hear from you.

Cole Engineering Group respects and celebrates the excellence of its staff and is proud of its ranking as one of the 50 Best Employers in Canada by Queen's Centre for Business Venturing, Hewitt Associates, and the Globe and Mail. As an equal opportunity employer, we offer a first class working environment and highly competitive compensation packages including performance bonus opportunities.

Qualified, professionally registered individuals and industry leaders with experience in the categories listed below may apply online to: **Careers@ColeEngineering.ca**.

### **Senior Transportation Planner/Traffic Engineer**

Cole Engineering Group is a mid sized multi-disciplinary engineering firm located in Markham (Hwy 404 and Hwy 7), specializing in land development, transportation, water resources, and municipal infrastructure. Our current transportation clients include various local municipalities and school boards, provincial government ministries, private developers and their representatives. The company is currently seeking a Senior Engineer (PEO registered P.Eng, (or eligible), or CET) with Minimum 5-10 years transportation planning/engineering experience

The applicant will be a creative individual with a proven track record to perform and manage a wide range of transportation projects. Demonstrated project management experience of five to ten years of relevant Canadian experience in this field is a definite asset.

#### **Qualifications & Demonstrated Abilities:**

- Solid experience in traffic engineering, transportation planning, and functional design.
- Strong technical, team leadership, oral and written English, and communication skills
- Ability to lead strong technical design teams through tuned project management, client services and interpersonal skills
- Knowledge of HCS, Synchro and CCG analysis techniques
- Manage a variety of transportation projects, including area-wide transportation studies, parking studies and traffic impact studies
- Be involved through all project stages, from scope, through planning, design, and completion using your demonstrated abilities to recognize opportunities, understand client needs, and manage, schedule and deliver projects
- Prepare proposals, cost estimates, work plans and feasibility studies
- Prepare functional road and access design and parking layouts
- Participate in business development and liaise with clients, government officials, approvals agencies, etc.; supervise other technical personnel

This job offers immediate responsibility with management potential, and is 'career based' appropriate for established engineers looking for a leadership role in the company. Cole Engineering recognizes that our strength is in the people we work with and provides competitive compensation, interesting opportunities, and a safe and supportive work environment.
